PROJECT #42.30351

AN UPDATE FROM MALAWI

Malawi Core Ministry

Pastors are being equipped and empowered to advance God's Kingdom in Malawi!

- After completing their Certificate in Theology course, **pastors receive administration and capacity-building training** from local leaders at the Ministry Center
- **Local leaders implemented a corn-grinding mill** to be used as a national church business and provide income to support the ministry
- **They are starting a sustainable farming initiative** at the Ministry Center to minimize costs by producing food for the pastors and generating additional funds through crop sales

PROJECT #42.30351

THANK YOU!

Your generous support enables local leaders in Malawi to train and equip pastors with a strong foundation in God's Word through biblical and theological training, preparing them to minister effectively in their villages and communities while also meeting the needs of the local church to become self-sustaining.

"[This project] has enabled us to bring all the pastors together and share a vision about the church and sustainable projects."

- Project Manager, Rev. Emmanuel Masamba
