PROJECT #42.30351

AN UPDATE FROM MALAWI

Malawi Core Ministry

WHAT'S HAPPENING?

Pastors are being equipped and empowered to advance God's Kingdom in Malawi! After completing their Certificate in Theology course, they receive administration and capacity-building training from local leaders at the Ministry Center.

In other news, local leaders implemented a corn-grinding mill that is now operational. It will be used as a national church business and provide income to support the ministry. They are also working on a sustainable farming initiative at the Ministry Center to minimize costs by producing food for the pastors and generating additional funds through crop sales. These projects help ensure the long-term sustainability of the Church of God in Malawi.

Other goals for this project are to ensure that district and regional pastors have bicycles to travel for evangelism and church meetings, to provide Bibles and songbooks for every church, and to supply local church buildings with the necessary materials for strong roofs.

HOW HAS THIS PROJECT MADE A DIFFERENCE?

"It has enabled us to bring all the pastors together and share a vision about the church and sustainable projects."

- Project Manager, Rev. Emmanuel Masamba

THANK YOU!

Your generous support enables local leaders in Malawi to train and equip pastors with a strong foundation in God's Word through biblical and theological training, preparing them to minister effectively in their villages and communities while also meeting the needs of the local church to become self-sustaining.
